CeQureX Technology is thrilled to announce the appointment of [Mario Domingo, PhD](#) as Chief Technology Officer for the Asia Region.

With a distinguished executive career spanning the global tech industry, Dr. Mario's appointment marks a bold and transformative step forward — one that ignites new momentum and unlocks extraordinary possibilities for our company and the entire region.

As our visionary leader in Asia, Dr. Mario Drawing on three decades at the intersection of capital markets technology, large-scale digital transformation, AI systems engineering, and sovereign-grade cybersecurity, Dr. Domingo brings a uniquely applied perspective to CeQureX. He has led complex modernization programs across financial services, energy, media, education, and defense — including advisory work with national institutions and armed services in Southeast Asia — and has consistently focused on building resilient, interoperable systems at scale. In CeQureX, his vision is clear: to operationalize Post-Quantum readiness through pragmatic architectures, trusted partnerships, and measurable execution. Strategically, he will focus on three priorities: accelerating production-grade PQC adoption across regulated industries; building sovereign, standards-aligned cryptographic infrastructure across Asia; and cultivating a regional ecosystem of practitioners, policymakers,

and technologists committed to long-term cyber resilience.

In an era where quantum computing is redefining the future of cybersecurity, Dr. Mario will accelerate CeQureX' s pioneering mission to bring Post-Quantum Cryptography (PQC) from vision to reality. With Asia as our strategic heart and launchpad, we will empower governments, major financial institutions, and critical infrastructure operators to become quantum-ready — not just surviving the coming revolution, but thriving in it.

Please join us all to welcome Dr. Domingo and the team.
